## Cover Page

The locomotives of class V 100 could be found nearly everywhere in Germany. This weathered one is in service with a commuter train in the Lippe area. Typical for this central mountain region are the nice viaducts – one of them will be crossed now by the train. Photo: Axel Schmidt

## January

78 355 had its best time before. Traces of lime and rust characterize the impressions of the boiler. And also the dirty wheels have not been cleaned up for a long time. But this steam locomotive runs reliably as ever.

## February

Fog is on the cold coast of Amrum and it is the season without any tourism. But there is a little traffic on the rails. The Wismar railbus' colours of the island railroad fit perfectly those of the sand and the sea. Photo: Dirk Kuhlmann

## March

When the spring comes the life on the farms awakes. We see the preparations to bring out the manure to the fields which was collected during the winter. Later the farmer will sow grain and corn. Photo: Andreas Petkelis

## April

On Deal Island a Santa Fe's ALCO PA1 of Santa Fe meets the photograph near the water. AZL created a perfect model which fits just perfect to the landscape of this layout. Photo: Sven Rohmann

## May

In Steinbach the barriers of the railroad crossing force the cars to wait. First passes by a customer detailed class E 50 locomotive by Märklin with a long and heavy freight train.

## June

Long freight trains are typical for US American railroads of the present time. Two EMD GP diesels of the BNSF carry a double-stacked container train along the signal tower. Photo: **Ztrack**

## July

The Diesel locomotives class 216 were also in service under catenary. And it is like this when 216 090-1 is crossing a viaduct with a train of gas tank car.

## August

The Olympic games inspired Märklin in the past to beautiful and special models. The first one in Z scale was 18 137 of Deutsche Reichsbahn-Gesellschaft whose prototype advertised the summer games of 1936 in Berlin. Photo: Andreas Petkelis

## September

Heavy freight trains in the United States are also the theme of this month. While a tank car train passes by in the foreground we look to a freight terminal behind – here are loaded intermodal trains with containers.

## October

Only an episode in the history of German commuter trains to win new passengers for rail traffic was the Citybahn between Cologne and Gummersbach initiated by the DB. The locomotives came from the Hagen-Eckesey depot. This photo in front of the Rhein-Ruhr station is for the memory of the layout's constructor Günter Guttenbach.

## November

Only a few kilometres away from Zell (Mosel) is located the small city of Bullay with its famous double-deck bridge. 181 219-7 produced by Rokuhan had its home on this line until the end of 2014 primarily pulling intercity trains. Photo: Noch

## December

The Henschel steam snowblower pushed by the „Höllental loco“ class 85 cleans the tracks from snow at the smallest part of the valley (Hirschsprung, „dear jump“) to keep running the christmas traffic back home.
